## AFTER YOU ARRIVE

■ Inquire about a furnished unit for the first four weeks. Hire a car at the airport, then after a few days purchase a car quickly as it is the best way to become familiar with your new surroundings.

■ Start applying for jobs, and visit recruitment agencies – it helps if they can meet you face-to-face.

■ Drive around different suburbs to see where you want to live. Try talking to locals in the area. Once you have an idea of where you can afford, which is handy for your job and so on, then you can look at renting for a few months or purchasing a property.

■ If you are looking at buying a property bear in mind that you will require a 20 per cent deposit, and you can look at borrowing 80 per cent from a reputable bank.

■ Try and do as much research of your own before you go, looking into factors such as the climate, job situations, rent and property prices for that area.

■ If you have children, bear in mind that locations in good school zones are usually more expensive with rental and property prices.
